A reverse mortgage is considered a loan and therefore income exempt.

11. STATE POLICY RESPONSE (CFPB USE ONLY):

The state concurs with the proposed answer.

A reverse mortgage in which the borrower/annuitant receives payments drawn from the equity of the home and as such is excludable as a loan rather than countable as income or a resource. In a reverse mortgage the borrower is guaranteed regular payments for life, but legally, it is still a loan secured by the residence and when the borrower/annuitant dies or otherwise vacates the house, it is sold and the proceeds are used to repay the lender.
